

Greencells expands Management Team in context of strong company growth and appoints Björn Lamprecht as new Chief Operating Officer of the Group

Saarbrücken, 6 October 2021 – Greencells, a global developer and EPC service provider for utility-scale solar power plants, is responding to the company’s continued strong growth by expanding its Management Team. Björn Lamprecht has been appointed as the new Chief Operating Officer (COO) of the Group with effect from 1 October 2021 and is thus responsible for the operational business of the Group. He succeeds Patrick Clemens, who has acted as both COO and Chief Technology Officer (CTO) and who will remain as the company’s CTO, concentrating entirely on the sustainable innovation and technology orientation of Greencells.

Björn Lamprecht has many years of experience in the renewable energy sector. In particular, as Chief Operating Officer of GOLDBECK SOLAR GmbH, he was responsible for the operational business, the implementation of the growth strategy and various M&A programmes. Most recently, he was a Management Board member of Aquarion AG, an EPC company in the field of sustainable water treatment. Further professional milestones include the industrial technology provider Voith, in whose Senior Management Björn Lamprecht worked internationally for several years, as well as his successful work in management consulting.

Andreas Hoffmann, CEO of Greencells: “We are delighted that we have been able to bring on board Mr. Lamprecht, a proven expert in the field of renewable energies. We have known and appreciated Björn Lamprecht for many years, not least because we got to know him as a very competent business partner as the then COO of GOLDBECK SOLAR, a company with which we have a trusting partnership. With Björn Lamprecht in the extended Management Team, we see ourselves in an excellent position to participate sustainably in the expected global market growth as one of the largest solar groups in Europe.”

Björn Lamprecht, COO of Greencells: “Greencells has undergone a very exciting development in recent years, which has been characterized in particular by strong corporate growth. From my point of view, however, this was only the beginning, as the potential continues to be enormous. I look forward to being part of this success story and helping Greencells to ideally fulfil its growth potential.”

About Greencells Group:

Greencells Group is a global project developer and provider of EPC and O&M services for large-scale solar power plants. With a track record of over 2.2 GWp of installed capacity, the company is an experienced partner for the optimal planning, financing, implementation and operation of solar parks. Founded in 2009 and headquartered in Saarbrücken, the Greencells Group employs around 100 people and several hundred skilled workers on its active construction sites. As one of the largest European providers of solar power plants, the company has already been successfully involved in the construction or planning of more than 135 photovoltaic plants in over 25 countries.
